PRESIDENTS MESSAGE

JANUARY 2001

HAPPY NEW YEAR AND HAPPY HUNTING. WELL I CAN'T BELIEVE IT'S ANOTHER YEAR AND I KNOW WILL SEE SOME GREAT FINDS THIS YEAR. THIS MEETING WE ARE HAVING AN OFFICER OF THE BLM COME TO SPEAK TO US ON THE LAWS OF METAL DETECTING ON PUBLIC LANDS. PLEASE PLAN TO BE HERE FOR THIS ONE. WE ARE ALSO GOING TO GO OVER THINGS FOR THE COMING YEAR AND NEED TO GET THEM PLANED. PLAN ON NEXT MONTH TO START THE FIND OF THE MONTH AND WE WILL HAVE DISPLAY NIGHT. MAKE SURE YOUR DISPLAY HAS ONLY THINGS IN IT THAT YOU FOUND LAST YEAR. WE WILL HAVE PRIZES.

REMEMBER THAT THIS MEETING WE WILL BE RAFLING OFF TEN GOLD COINS AND MANY OTHER PRIZES. ALSO REMEMBER THAT YOUR CLUB DUES ARE NOW DUE IF YOU HAVN'T PAYED THEM YET. YOU WE FIND A MEMBERSHIP FORM IN THIS NEWS LETTER. WELL THATS IT FOR NOW WILL SEE YOU AT THE MEETING.

THANKS, PRES. REX LANG

The Use of Metal Detectors In the National Forest

The use of metal detectors takes a number of different forms. They are used for searching for treasure trove, locating historical features and artifacts, prospecting for minerals, and searching for coins and lost metal objects.

TREASURE TROVE includes money, unmounted gems, precious metal coins, plate, or bullion that has been deliberately hidden with the intention of recovering it later. The search for buried treasure can involve methods that are potentially damaging to forest resources, thus a special-use permit from the Forest Service is required. Each permit request is thoroughly evaluated and permits may not be granted in each and every case.

ARCHAEOLOGICAL SITES: The use of metal detectors to locate objects of historical or archaeological value is permitted subject to the provisions of the Antiquities Act of 1906, the Archaeological Resource Protection Act of 1979, and the Secretary of Agriculture's Regulations. This activity requires a special-use permit. Permits are available only for legitimate research activities conducted by qualified individuals. Unauthorized use of metal detectors in the search for and collection of historic and archaeological artifacts is a violation of existing regulations.

MINERAL DEPOSITS: The use of a metal detector to locate mineral deposits such as gold and silver on National Forest System lands is considered prospecting and is subject to the General Mining Law of 1872. No permits are required for prospecting. However, one may be required to file a Plan of Operations if the prospecting work will involve land disturbing activities.

RECENT COINS/METAL OBJECTS: Searching for coins of recent vintage and small objects having no historical value, as a recreational pursuit, using a hand held metal detector, does not require a special-use permit as long as the use of the equipment is confined to areas which do not possess historic or prehistoric resources.

SPECIFIC PROGRAMS for metal detector volunteers are offered each year by the Tahoe National Forest. These programs provide opportunities for detectorists to contribute to important historical research in this area.

An 8 Reales Coin, a So-Called
"Pillar Dollar"

Two-Bits

A Cut 1/4 Segment of an 8 Reales
Coin, Worth 25c

A 2 Reales Coin Worth 25c

The Origins of the United States Quarter Dollar

In Colonial American times, the coin of widest acceptance was the Spanish Colonial 8 Reales and its fractional parts of 4, 2, 1 and 1/2 Reales. These coins came from the silver-rich countries of Mexico, Bolivia, Chile, Colombia, Guatemala and Peru. In fact, our monetary system of coinage denominations, and the dollar value itself, was directly tied to the silver content of an 8 Reales coin, which by statute was given a value of exactly \$1.00. The 2 Reales pieces were valued at 25c. Sometimes, the 8 Reales coins were physically cut into pieces. The smallest piece was called a "bit", and was equal to 1/8 of Spanish Milled Dollar or 12-1/2c. Two of these equaled 25c, and that is where the expression "two bits" comes from, the slang term for a quarter.
